

THERMAL FOGGER

The Bonhoeffer thermal Fogger stands as a versatile and reliable tool in the realm of pest control and sanitation. Engineered with a focus on efficiency, durability, and user-friendliness, this machine embodies cutting-edge technology to address various needs in agricultural, industrial, and public health sectors.

USAGE OF MACHINE

Butane gas can Slot

Crops

Industries

Floriculture
Crops

Pest Control

FEATURES

STRONG POWER BURST:

The Bonhoeffer thermal Fogger is equipped with a robust power burst feature, ensuring efficient dispersion of fogging solutions for effective pest control or sanitation.

LIGHTWEIGHT AND BALANCED:

Despite its powerful capabilities, the BON-P-TF2L is designed to be lightweight and balanced, allowing for easy maneuverability and comfortable handling during operation.

BOTH ELECTRIC AND MANUAL STARTING:

Offering both electric starting for quick and convenient ignition and manual starting for backup and reliability in various situations, our Thermal Fogger provides flexibility and ease of use.

RESISTANT TO CORROSION

Thermal Fogger is resistant to corrosion and ensures uninterrupted electrical flow, enhancing durability and longevity even in harsh environments.

STANDARD EQUIPMENTS

				
coke cleaning devicev	shoulder strap	L & KEY	nozzle	Tank Cap

TECHNICAL SPECIFICATIONS

Tank capacity	2.0 liters
Pump flow	1.2 liters
Weight	1.4 kilograms
Solution Output	1.5 to 2 litre / h
Fuel Consumption	225 g/hrs
